

Medical Logistics

MISSION: To exercise oversight responsibilities for managing the acquisition and logistics aspects of the medical research, development, and acquisition (RDA) program. This includes the procurement and fielding of products required by medical units, as well as supporting new medical equipment and medical facilities for the Army.

The U.S. Army Medical Materiel Agency (USAMMA) enhances military readiness by providing medical logistics support for the full spectrum of DoD health care missions worldwide; developing and implementing innovative logistics concepts and technologies; and serving as the Army agent for medical materiel sustainment programs. Its core competencies are life cycle management for medical acquisition; force projection and sustainment; broker of medical logistics information and knowledge management, and developing unique logistics knowledge and expertise in its people.

The U.S. Army Medical Materiel Center-Europe (USAMMCE) provides Joint medical logistics support worldwide, and customers include the Navy, Air Force, and Marines, as well as U.S. embassies throughout Europe, the Middle East, and Africa. The USAMMCE also played a major role in medical support of Operations Desert Shield/Storm, Provide Comfort, and Provide Hope, and supports humanitarian relief efforts throughout the world.

The U.S. Army Health Facility Planning Agency (USAHFPA) supports major Medical Military Construction projects. This requires involvement from a project's inception including programming and strategic planning, through design and construction, into final occupancy.
